About the National Conference

The Indian Knowledge System (IKS) encompasses a vast array of knowledge, practices, and traditions developed in India over millennia, spanning fields such as mathematics, astronomy, medicine, engineering, philosophy, and arts. Grounded in philosophical insights, IKS offers holistic perspectives on knowledge, wisdom, and truth, as highlighted in the National Education Policy (NEP) 2020. Integrating IKS into modern education is crucial for preserving this intellectual heritage, fostering research, and nurturing India's cultural identity within the global academic community. This National Conference aims to facilitate discussions among academicians, researchers, and policymakers on incorporating IKS into higher education curricula. It will serve as a platform to explore strategies for fostering interdisciplinary research and promoting a deeper understanding of India's intellectual legacy, as envisioned by NEP 2020, ensuring that IKS plays a vital role in shaping contemporary education and research practices.
